Project Description:

Artwork provided as part of renovations for The Service Center, in Christiansburg Virginia. (This location services vehicles purchased from multiple car dealerships operated by our client.) Our firm collaborated with the customer as well as an interior designer, to integrate furniture, fabric design, and other finishes fully with the artwork.

Artwork Description:

Custom printed oversize canvases, are Stretched on heavy duty stretcher bars, Framed in a "Cappuccino" finished, Deep profile solid wood frame.

To achieve a balanced design for the space,
The canvases are coordinated with framed
images (from unmatted to triple matted).
Artwork is UV protected / reflection control.

Tip: To check quality, always look at the corners.
Is the frame precisely cut and aligned? Are the
mats cut evenly, without over-cuts and other
mistakes? Is the matting acid-free? If the bevel
(cut) is not bright white or solid-color the mats are
likely acidic and will discolor and harm the artwork.

Concept Through Completion:
We guide you through the process of
acquiring exactly what you need and want.
